VOLUME CONTENTS

1987 NUMBER 1

CONTENTS

G. N. Alexandrov, A. I. Afanasev and V. L. Ivanov	1	The electric strength of the insulating structures of extra-high-voltage apparatus when acted upon by lightning surges
R. G. Knizhnik, M. L. Landa, Yu. I. Lyskov and L. G. Pogorelyi	13	The additional power losses due to high-voltage overhead line phase parametric asymmetry
B. I. Konevskii and A. G. Mnukhin	20	Determination of switching surge protection parameters by computer experiments
S. L. Kazaryan	27	Selection of windings with a fractional number of slots per pole and phase
V. A. Venikov, I. A. Budzko, M. S. Levin, E. L. Blokhina and V. A. Petrov	34	On the methods for solving multi-criterial power supply optimization problems with indeterminate quantities
I. V. Zhezhelenko and Yu. L. Saenko	47	Reactive power in power supply problems
Ye. I. Berkovich	59	An analysis of valve models for solution of discrete optimization problems in operations research
G. N. Alexandrov and G. D. Kadzov	75	On increased effectiveness of lightning protection
V. S. Khachatryan and E. A. Etmekchyan	82	A method for power system steady state correction
T. V. Vas'kova, B. I. Iof'ev and A. I. Kolpakova	102	The controlled cross-section in a large power system
A. M. Oleinikov	116	The electromagnetic and geometric relations in an induction motor multi-layer rotor
V. I. Lukovinkov, S. I. Zakharenko and S. A. Grachev	126	An approximate method for analysis of symmetrical-rotor induction motor stepping
	140	Abstracts of papers not translated from *Elektrichestvo*, Nos. 1–3, 1987

1987 NUMBER 2

CONTENTS

U. Bachmann, V. K. Vanin, A. M. Ginovker, G. M. Pavlov and A. V. Pechkovskii	1	Synthesis of measuring devices for relay protection as a gradient self-adjusting system
Yu. V. Zozulin, V. S. Kil'dishev, I. Ya. Cheremisov and V. G. Keshishev	14	How high-power turbogenerator characteristics are influenced by the rated frequency
V. I. Milykh	22	The electrodynamic processes in superconducting d.c. motor mutipole excitation system screens

Yu. A. Bortsov, N. N. Pashkov and **I. B. Junger**	35	Induction motor zero-overshoot response nonlinear model control
L. S. Perel'man (dec.)	41	Calculation of the electric field in a system of conductors with set and "floating" potentials
E. M. Bazelyan	47	The leader of a long positive spark
K. S. Demirchyan and **G. F. Muchnik**	60	The scope for self-organization in electrophysical problems
V. V. Filaretov	69	The isomorphous transformations method for analysis of quasi-full and quasi-uniform admittance graphs
L. P. Poberezhskii, V. B. Dialektov, L. Ye. Lomonosova and **V. K. Chudnov**	80	Tooth contour admittance analysis of the winding parameters of linear inductor motors
L. I. Glukhivskii, O. V. Perkhach and **T. V. Perkhach**	87	An analysis of the asynchronous state characteristics of an asynchronized turbogenerator
G. N. Aleksandrov and **G. A. Yevdokunin**	98	Greater effectiveness of a.c. transmissions
A. S. Vasil'ev and **Yu. I. Blinov**	109	The high-frequency supply sources for electrical process plant
	118	Abstracts of papers not translated from *Elektrichestvo*, Nos. 4–6, 1987

1987 NUMBER 3

CONTENTS

N. V. Shilin and **I. S. Levchenko**	1	A hybrid model study of an oil circuit breaker gas buffer
A. F. Krogeris, K. K. Rashevits, E. P. Treimanis and **Ya. K. Shinka**	15	Instantaneous power estimation of energy supply processes
V. Ye. Tonkal', V. Ya. Zhuikov and **S. P. Denisyuk**	27	Energy analysis of supply processes in valve converter systems
G. F. Muchnik, M. G. Domanin and **A. Yu. Astakhov**	34	The apparatus of Feigenbaum's universal theory for an oscillatory circuit with nonlinear capacitance
Yu. A. Bobkov	40	A generalized scheme study of stator winding conductor transposition
Ye. I. Yantovskii	50	Power supply net energy
Ch. Krulikovski and **A. Kaminska-Pranke**	60	Mathematical modelling of an electric arc stabilized by a laminar flow of gas
A. F. Hagen	69	Transformer all-in-one external and internal faults protection
V. G. Bogrunov, L. B. Lazareva and **G. I. Samorodov**	73	The asymmetrical conditions in EHV transmissions during transients

M. L. Kostyrev	82	The cage-rotor asynchronous generator valve self-excitation regions
K. P. Kadomskaya, Yu. A. Lavrov and I. I. Mishkel'	92	The hydro-electric power station link cable insulation surge protection
V. I. Zhilyakov and V. G. Dryuchin	102	Two-mass electromechanical system optimum control synthesis
	112	Abstracts from papers not translated from *Elektrichestvo*, Nos. 7–9, 1987

1987 NUMBER 4

CONTENTS

I. P. Beloedova, Yu. V. Eliseev and Ye. S. Kolechitskii	1	Calculation of the voltage distribution in SF_6-insulated surge limiters
Ye. L. L'Vov	13	The spatial forces and field tensors in magnetic bodies
V. V. Kuz'min, W. G. Katzmann and A. L. Livshits	25	How turbogenerator rotor vibration is influenced by winding asymmetrical cooling
G. S. Tamoyan and I. F. Nuka	32	Calculating the electromagnetic field and losses in the stator magnetic circuit of end-plate electric machines with toroidal polyphase windings
A. M. Bronstein and V. B. Kozlov	40	The present state and trends in the development of high-voltage circuit breakers
V. P. Vcherashnii	58	An assessment of power production structures
N. P. Volchukov, V. Ya. Elksnis and M. V. Chernyavskaya	70	Commutation capacity optimization of the number of d.c. machine balancing connections and their parameters
G. K. Zherve	77	Anomalies in self-braking experimental curves of large synchronous machines
A. A. Gremyakov, I. N. Kovalev, Ye. Yu. Samsonova, V. A. Stroev, V. V. Fadeev and M. A. Yakh'ya	83	Optimization of the capacitor bank distribution between power consumers
F. A. Zykin	93	The energy processes in supply systems with loads adversely affecting the quality of electric energy
S. N. Komin, G. S. Kuchinskii and Ye. A. Morozov	103	How the electric strength of water is influenced by various substances in the microsecond range
V. D. Lebedev and B. E. Morshchikhin	111	About greater accuracy of digital electromechanical servomechanisms under changing conditions in service
	117	Abstracts of papers not translated from *Elektrichestvo*, Nos 10–12, 1987
